ELEMENTI®
GAS FIRE

Fire – The most significant role in humanity's development. Human history tells us that the use of fire had generated a new era of human's striving for freedom and conquering the nature since fabrication of stone tools.

ABOUT ELEMENTI

Originated in Los Angeles, USA. Elementi is a group of artists and craftsmen that are dedicated to combining market with high-quality aesthetics of outdoor living in the wild landscape. Our directive is always to design and manufacture artistic combinations of form and function.

Beauty is the foundation of everything. For our product line of fireplaces, burners are reprocessed on items that are gorgeous on their own, which combination turn themselves into masterpieces that will be sure to become the highlight of any patio and landscape design.

Innovation and technique are the keys to progress. We design, manufacture and launch all of our products that are fresh to the marketplace. Our professional engineers design and built burner systems in our fireplaces, which serves for ideal size and shape of burners （modified burner ring and BTU output） and excellent flame effect.

CUSTOM MANUFACTURING

No matter your preferred style is natural, historic, or modern, our designers can customize for you. We make fire features with a wide range of BTU outputs for both residential and commercial installations. We can also incorporate features such as safety valves, pilot systems and remote electronic ignition into all of our fire pits.

PRIVATE LABEL MANUFACTURING

Large capacity production is no problem for us. We can supply full truckloads of private labelling products for large volume retailers. Our designers are capable of revising our current designs or working with purchasing departments to create novel designs to meet their needs.

CERTIFICATION STANDARDS

All Elementi fire systems strictly follow the standards of North American ANSI Z21.97-2017/CSA 2.41-2017 and the European Union. All our products have achieved certificates from the CSA or CE, among which CSA is the most authoritative institution in North America for products' safety and environmental protection.
