- OEM Customization Services:
Fully supporting brand collaborations and project-specific requirements.

STANDARD TEXTURES AND COLORS

Through handcrafted, the surface of GFRC presenting a naturally, unique texture with subtle color gradients and textural variations. It creates a deep and solid sensory experience. This characteristic is particularly distinctive among many surface materials. The standard GFRC color palette is shown below, with each color achievable in diverse effects through different surface treatment processes.

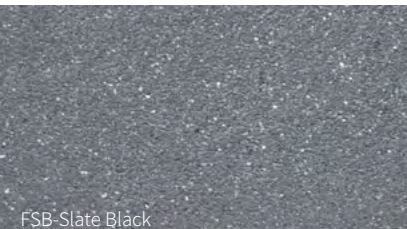

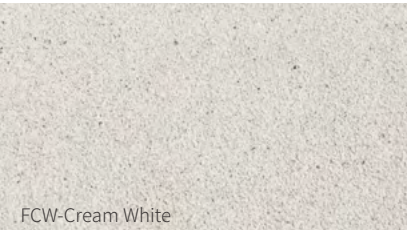

HONED

- Suitable for: Furniture, sink & bath, fire tables, fountains, indoor/outdoor lighting, wall panels, floor paving, planters.
- Presents a classic, smooth concrete appearance, retaining naturally formed fine pores for a delicate and authentic texture.
- Surfaces are coated with a high-performance nano-coating that protecting against various stains and oil.

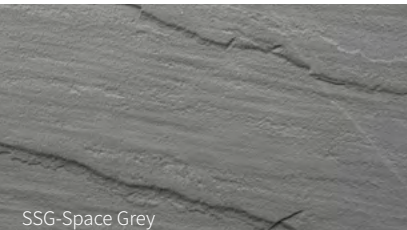

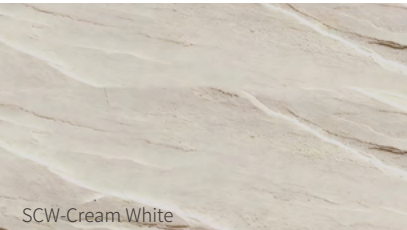

SANDSTONE

- Suitable for: Furniture, sink & bath, fire tables, fountains, indoor/outdoor lighting, wall panels, floor paving, planters.
- Surface has a more pronounced rough texture, presenting the unique gritty feel of concrete, with a style leaning towards natural and industrial.
- Surfaces are coated with a high-performance nano-coating that protecting against various stains and oil.

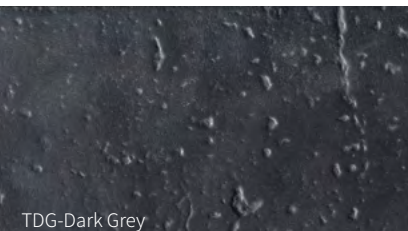

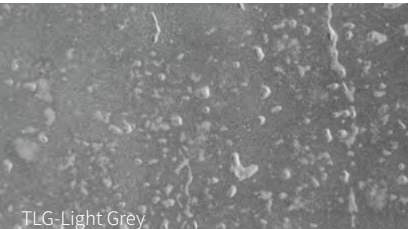

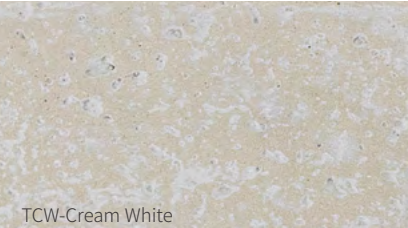

SLATE

- Suitable for: Furniture, sink & bath, fire tables, fountains, indoor/outdoor lighting, wall panels, floor paving, planters.
- Mimics the texture effect of natural sandstone after splitting. Clear layered lines and a naturally raw tactile feel, suitable for designs emphasizing natural style or architectural sense.
- Surfaces are coated with a high-performance nano-coating that protecting against various stains and oil.

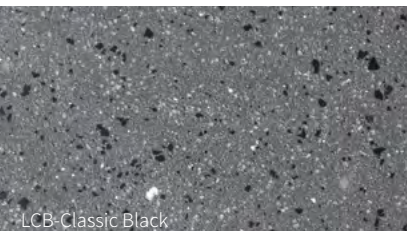

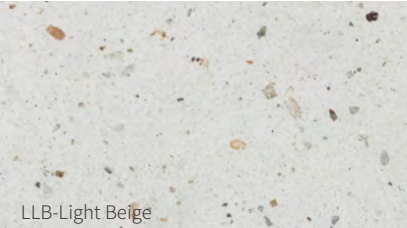

TRAVERTINE

- Suitable for: Furniture, sink & bath, fire tables, fountains, indoor/outdoor lighting, wall panels, floor paving, planters.
- Inspired by the classic and widely popular travertine texture, the surface shows naturally undulating textures and retains the iconic porous effect of travertine, offering strong decorative appeal and natural stone beauty.
- Surface is treated with a sealant, balancing aesthetics and practical protection.

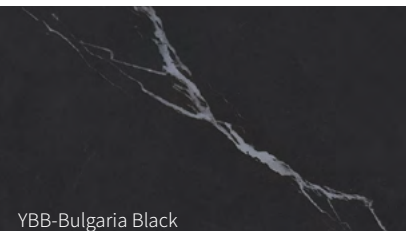

LIMESTONE

- Suitable for: Furniture, sink & bath, fireplaces, fountains, indoor/outdoor lighting, wall panels, floor paving, planters.
- Embeds natural aggregates of different sizes and materials into the concrete base, forming a rhythmic and decorative surface effect, combining vintage charm with modern design sensibility.
- Surfaces are coated with a high-performance nano-coating that protecting against various stains and oil.

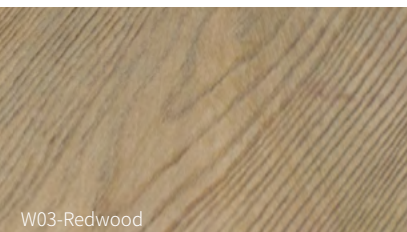

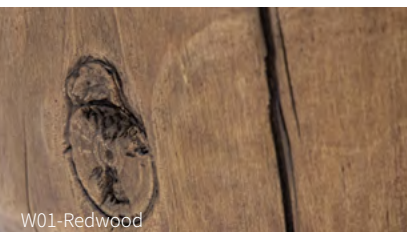

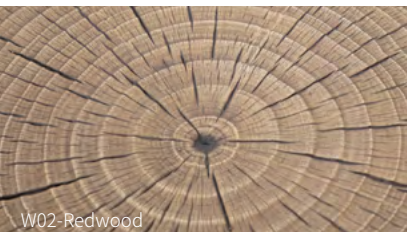

MARBLE

- Suitable for: Furniture, sink & bath, indoor/outdoor lighting products.
- Uses water transfer printing to evenly apply high-precision patterns onto the surface, capable of presenting wood grain, stone patterns, or other customized texture effects, achieving highly realistic material representation visually.
- This process maintains pattern integrity and continuity on complex curved surfaces and irregular structures, suitable for designs with high decorative effect requirements.
- Surfaces are coated with a high-performance nano-coating that protecting against various stains and oil.

WOOD

- Suitable for: Furniture, sink & bath, fire tables, fountains, indoor/outdoor lighting, wall panels, floor paving, planters.
- Accurately replicates the grain and texture of wood through GFRC processes, combining the warmth of wood with the durability of cement.
- Surfaces are coated with a high-performance nano-coating that protecting against various stains and oil.

CUSTOMIZES

GFRC material offers you maximum freedom and flexibility. If you desire something unique, ELEMENTI possesses rich color-matching capabilities to meet your needs.

GFRC not only can imitate the textures of various materials like different wood and stone. We offer multiple unique surface treatment methods to satisfy your different aesthetic and functional needs.

Beyond texture shaping during the casting and molding stage, GFRC can undergo secondary processing through chemical or mechanical methods like acid etching, grinding, and sandblasting after hardening, further expanding design possibilities.
